

## **56% of Secondary students say that science makes it difficult to believe in God**

We offer unique online secondary CPD to address the big questions and equip RS teachers to address science – religious belief themes, examined at GCSE and A' Level. The sessions offer high quality resources and a forum, to meet the challenges in teaching interdisciplinary issues such as evolution, origins, first cause and design of the universe.

### **1 hour live Webinar Zoom CPD courses**

These courses have been reviewed by secondary RE advisers and teachers with comments as follows:

*"I have been teaching RS for 20 years and never had CPD on this, it's exciting and really needed"* (Secondary RE adviser)

*"These courses are just what we need at this time, the content and prices are perfect"*

(Secondary RS teacher)

In 2010 General Synod passed the motion put forward by Manchester Diocese, that Science and Faith are compatible, which is included in the exam specification for GCSE and A' Level RS. The God and the Big Bang project was created in Manchester Diocese and has impacted thousands of students and teachers nationwide, deploying leading scientists and theologians to lead interactive science – faith sessions.

### **September Dates Available**
